

SMART/Web

e-Business for BPCS Customers

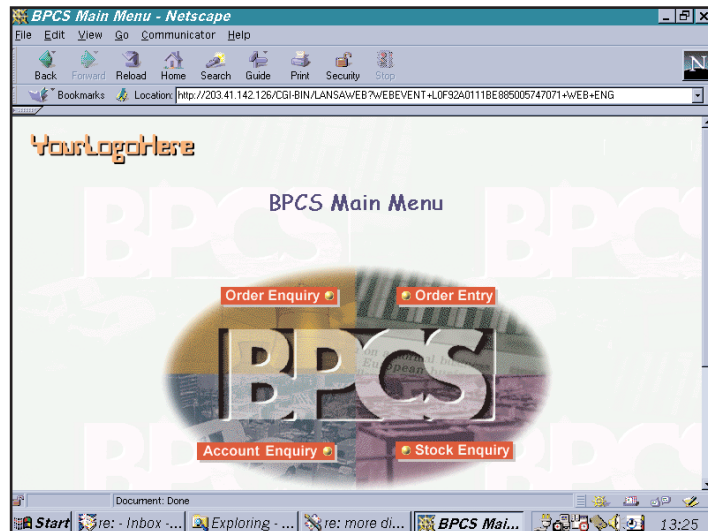

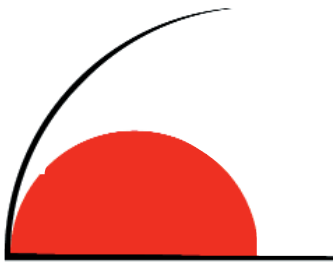

Improving customer service and reducing costs are two of the key reasons to extend your applications to the Web. SMART/Web is designed to provide Web-enabled functionality for eBPCS and BPCS CD licensed users. This functionality is developed using the award-winning tool, LANSA for the Web.

Access BPCS over the Internet

SMART/Web enables you as a BPCS customer to take your applications to the Internet. You will be able to conduct business with your customers over the Internet from any industry-standard Web browser. You can achieve this without the additional overhead of software distribution.

SMART/Web integrates seamlessly with other BPCS modules enabling your business partners, mobile sales and customer service staff to access the very latest customer, product, stock level and pricing details. Access can be via the Internet, your Intranet or an Extranet.

Improve customer service and reduce costs.

Your e-Business Benefits

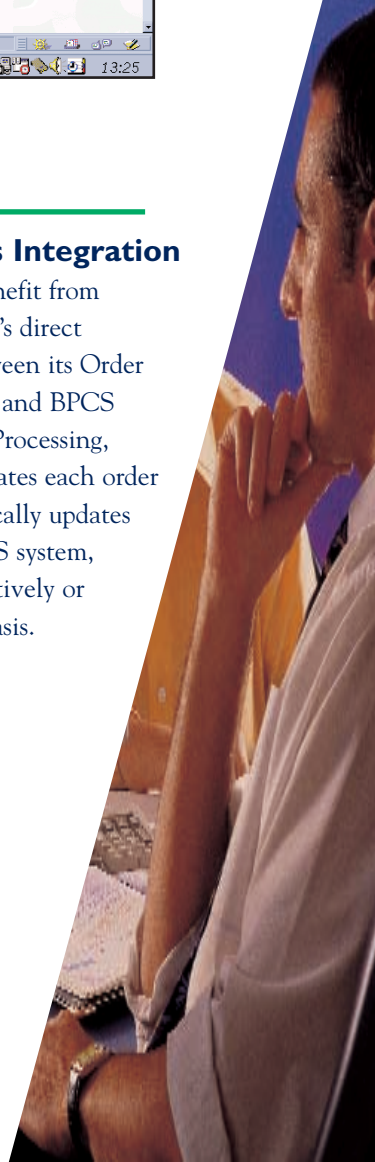

The SMART/Web product provides various facilities from a Web browser interface, including Accounts Receivable Inquiry, Product Inquiry, Customer Order Inquiry, Customer Order Entry and more.

The benefits to your business include:

- extended hours for customer service
- reduced costs
- improved customer service
- increased sales
- increased bottom line

e-Business Integration

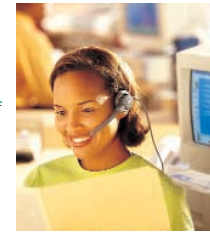

You will benefit from SMART/Web's direct interface between its Order Entry module and BPCS Batch Order Processing, which revalidates each order and automatically updates it to the BPCS system, either interactively or on deferred basis.

1. MOBILE SALES STAFF
Low cost Remote Inquiry and Order Access for Mobile Sales Staff

Your BPCS Server

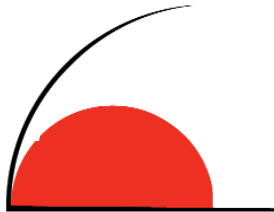

2. CUSTOMER SERVICE
Response to Customer Inquiries (Intranet)

REPLACE THE TRADITIONAL INTERMEDIARY FUNCTION

3. CUSTOMERS & BUSINESS PARTNERS
Customer access to Ordering & Inquiry facilities (via Extranet and/or Internet)

SMART/Web Benefits

Enhanced and intuitive screen design means that little or no training is required. You can also configure your Web site to include your own company logo, browser background and other images. Internet security is also

available to protect the privacy and integrity of your corporate data.

SMART/Web functionality can be extended using LANSA's world class development toolset.
